

A pharmaceutical company needed a versatile system capable of sleeving and shrinking sleeves on oval bottles at speeds of up to 100 bpm

CHALLENGE:

Orientation of graphics on the oval bottle must be precise

Compact Horizontal Perforator

CHALLENGE:

Tamper evident feature requires horizontal and tall partial vertical perforation to cover the spray nozzle overcap

CHALLENGE:

Large differential in container dimensions requires precise control of the shrinking process

SOLUTION:

- **PDC 50-ERL Shrinksealer** precisely applies the full body labels with graphic orientation
- **PDC Compact Servo HPV Perforator** provides complex tamper evident feature
- **PDC KST 80-712** series steam tunnel performs distortion free shrinking
- **Inspection/Rejection Unit** assures all labels are properly applied
- **Proprietary Shaped Tooling** – matches the footprint of container for precise graphic alignment

50-ERL Shrinksealer
